

Bridging the Gap between Research and Clinical Practice in Clinical and Interventional Cardiology

Dear readers, contributors, and esteemed colleagues,

It is with great pleasure and a sense of enthusiasm that I introduce you to the International Journal of Clinical and Interventional Cardiology (IJCIC). As the Chief Editor of this esteemed publication, I am honored to be part of a journal dedicated to advancing the fields of invasive clinical and interventional cardiology.

IJCIC aims to provide a platform where researchers, clinicians, and specialists can share their latest findings, innovations, and techniques in these crucial areas of cardiovascular care. Our ultimate goal is to bridge the gap between research and clinical practice, ensuring that scientific advancements translate into tangible benefits for patients worldwide.

In an era marked by rapid advances in technology, the field of invasive clinical and interventional cardiology has witnessed groundbreaking discoveries and transformative interventions. However, it is essential to recognize that research findings and clinical practice must go hand in hand to deliver the highest quality of patient care. IJCIC is here to facilitate this symbiotic relationship, fostering collaboration and promoting the translation of research into actionable knowledge.

One of the core principles that guide IJCIC is our commitment to open access. We firmly believe that scientific knowledge should be freely accessible to all, without any barriers. By embracing open-access publishing, we strive to ensure that researchers, clinicians, and healthcare professionals from diverse backgrounds and regions can access the latest research articles, review articles, case reports, and other content

related to invasive clinical and interventional cardiology. This accessibility not only accelerates the dissemination of knowledge but also promotes innovation and collaboration across borders.

To uphold the highest standards of quality and validity, IJCIC employs a rigorous peer-review process. This ensures that only scientifically robust and clinically relevant research articles are published. We are indebted to our dedicated panel of expert reviewers who generously contribute their time and expertise to evaluate the submissions and provide constructive feedback. This collaborative effort ensures the credibility and integrity of the published research, protecting the reputation of authors and fostering trust in our journal.

IJCIC aims to be more than just a scientific publication. We aspire to be a dynamic platform for the exchange of ideas, best practices, and professional development in the field of invasive clinical and interventional cardiology. Our journal will serve as a resource for continuing education, enabling healthcare professionals to stay abreast of the latest advances, techniques, and guidelines. By promoting collaboration between researchers, practitioners, and specialists, we hope to stimulate dialogue, spark innovation, and drive progress in patient care.

As we embark on this journey together, I encourage researchers, clinicians, and specialists in invasive clinical and interventional cardiology to submit their work to IJCIC. Your contributions will play a pivotal role in shaping the future of our field and improving the lives of countless patients.

In conclusion, I extend my heartfelt gratitude to all

the individuals who have made IJCIC a reality. Our editorial board, reviewers, contributors, and readers form the backbone of this journal, and it is through your collective efforts that we can bridge the gap between research and clinical practice. Together, let us embrace the challenges and opportunities that lie ahead, driving innovation, fostering collaboration, and advancing the frontiers of invasive clinical and interventional cardiology.

Wishing you all a fruitful and impactful journey with IJCIC!

Sincerely,

Prof. Abdullah Al Shafi Majumder,

Chief Editor,

International Journal of Clinical and Interventional Cardiology (IJCIC)

Secretary General of the Bangladesh Cardiac Society and former Director of NICVD
